Significant Snowfall Expected

(Kahnawake – 1 Enniska/ February 2021)

The Public Safety Division of the Mohawk Council of Kahnawà:ke is advising community members to monitor weather conditions, as a significant amount of snow is expected Tuesday and Wednesday.

Environment Canada has issued a Special Weather Statement for our region, with between 10-20 centimeters of snow expected, along with strong winds, which can generate blowing snow and whiteout conditions on highways and open areas and drastically reduce visibility. Try to avoid non-essential travel, and continue to monitor the local weather forecast.

Additionally, with snow in the forecast, Kahnawa'kehró:non who ride recreational vehicles are being asked to avoid the area in and around the Hydro Line 2 corridor. Crews are continuing to dismantle the transmission towers and remove soil. The area is not intended for public or recreational use and is **not safe** for vehicles such as ATVs or snowmobiles.
