Tsi Nahóten Karihwanákere No'nenk News Release

Mercier Bridge Weight Restrictions

For immediate release

(Kahnawá:ke – 30, Onerahókha / April 2007) The MCK would like to advise the community that, following Transport Québec inspections of the Mercier Bridge, an overload weight restriction has been imposed for the Kahnawá:ke bound lanes of the structure.

The restrictions were put in place as of Saturday, April 28, 2007 to protect the concrete of the structural slab against premature degradation. This announcement follows the directive announced last April requiring all large trucks to use only the left-hand (passing) lane of the span

For traffic information 24 hours a day, call 1-888-355-0511, or #0511 for Bell Mobility subscribers. The public can also visit the Web site www.inforoutiere.qc.ca.
