## Vaccination Update and Upcoming Clinics

(Kahnawake – 22, Ohiarikhó:wa/July 2021)

The Kateri Memorial Hospital Centre (KMHC) would like to update Kahnawa'kehró:non on the results of the latest vaccination clinics. The following percentages are the total of each age group vaccinated up to July 22, 2021:

<u>1st dose</u>		<u>2nd dose</u>	
18+:	78.5%	18+:	66.9%
16-17:	84.7%	16,17:	55.3%
12-15:	58.9%	12-15:	10.9%
12+ (all):	77.3%		

The following vaccination clinics will take place from **9am - 4:30pm** on:

- **Wednesday, July 28 and Thursday, 29:** Pfizer 2<sup>nd</sup> doses and 1<sup>st</sup> doses if anyone is interested
- **Friday, July 30:** Moderna 2<sup>nd</sup> doses and 1<sup>st</sup> doses if anyone is interested.

Appointments are preferred by calling the KMHC at **450-638-3930, extension 2295**. However, walk-ins are welcome while vaccine supplies are available.

The most recent cluster of cases is related to the DELTA variant. From the analysis of this cluster, Public Health has learned that this variant causes a more widespread transmission at a much quicker pace. Double vaccination is demonstrated in the literature to be most effective in protecting individuals from hospitalization and death, especially in the face of COVID-19 variants.

If you are interested in reading more about recent studies regarding vaccination, visit the [COVID-19 Messenger RNA Vaccine](#) page on the Quebec Health portal.
