## **PUBLIC SERVICE ANNOUNCEMENT**

### **Infrastructure and Road Rehabilitation**

**(Kahnawá:ke – 25, Ohiarikó:wa / July 2007)** The Technical Services Department of the Mohawk Council of Kahnawá:ke would like to inform the community of the infrastructure and road rehabilitation in the area between Step by Step and the Peacekeeper station. The project started on Tuesday, July 24th and will continue until the end of September 2007.

The project will include repairs to the existing water and sanitary sewer systems, installation of a new surface drainage system and concrete curbs. The road will then be resurfaced with new asphalt.

Residents in the area may be inconvenienced with temporary loss of water, dust and noise from trucks and equipment, detours and temporary road closures. Residents will be notified at least one day prior to any water shut-offs.

Proper road signalization will be installed to warn of the construction limits. The community will also be notified when a road closure is scheduled.

For further information contact the Technical Services Department at 450 635 1016. (see map attached on page 2)

During construction alignment-pins will be installed (steel rods marked with orange ribbon) along the roadway. These pins **do not** indicate the edge of the new road. The new road edge is eight feet from the pin, away from the property line. This means that during construction the roadway will appear wider than actually is. At no point does the road infringe onto private property. All private properties that are affected by the work in this area (e.g. driveways, walkways, hedges and/or fences) will be repaired or replaced prior to the completion of the project.

The lane towards Chateaugay will be partially closed for the entire duration of the project, which will slow down the traffic in the area and contribute to increase noise levels. In an effort to reduce nuisance to residents, all Kahnawakehrónon are encouraged to avoid this road and find an alternative route to their destination.

Shown below is a map plan of the general area. The shaded area indicates where the works will take place.
